**DISERVAULEC**  
Automatización industrial

We gather experience in various industrial sectors and knowledge of the product.

We speak your language

Passion, strength, creativity, enthusiasm... it characterizes us.

We look for the best solution in the shortest possible time.

## INDUSTRIAL Sectors

The current industrial sector needs to automate its processes, engineering, etc. We offer customized solutions.

## SPAIN

Located in the south of Galicia, in the province of Pontevedra, near the frontier with Portugal, DISERVAULEC is in the most industrial area.

## EQUIPMENT

One of the main characteristics of DISERVAULEC is people. We listen, offer and give solutions.

## GROWTH

We are a company in constant growth, both in products and services. We are open to new proposals to grow together.

# INGENIERÍA DISEÑO PROPIO

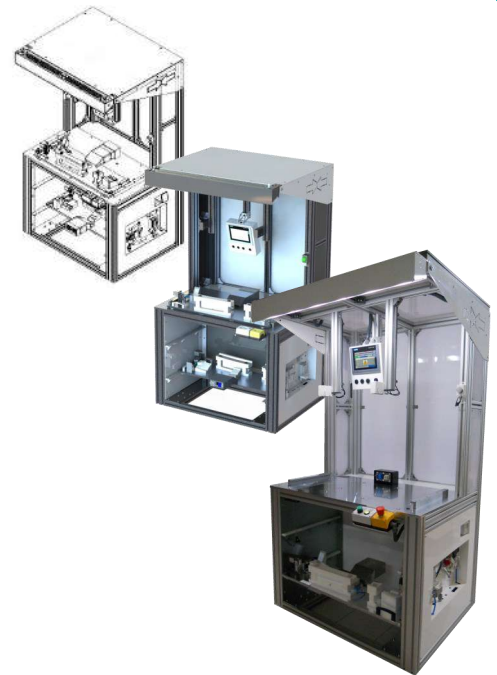

Actively listen to what the customer needs.

Understanding and analyzing all ideas -  
Brainstorming.

Develop the main idea

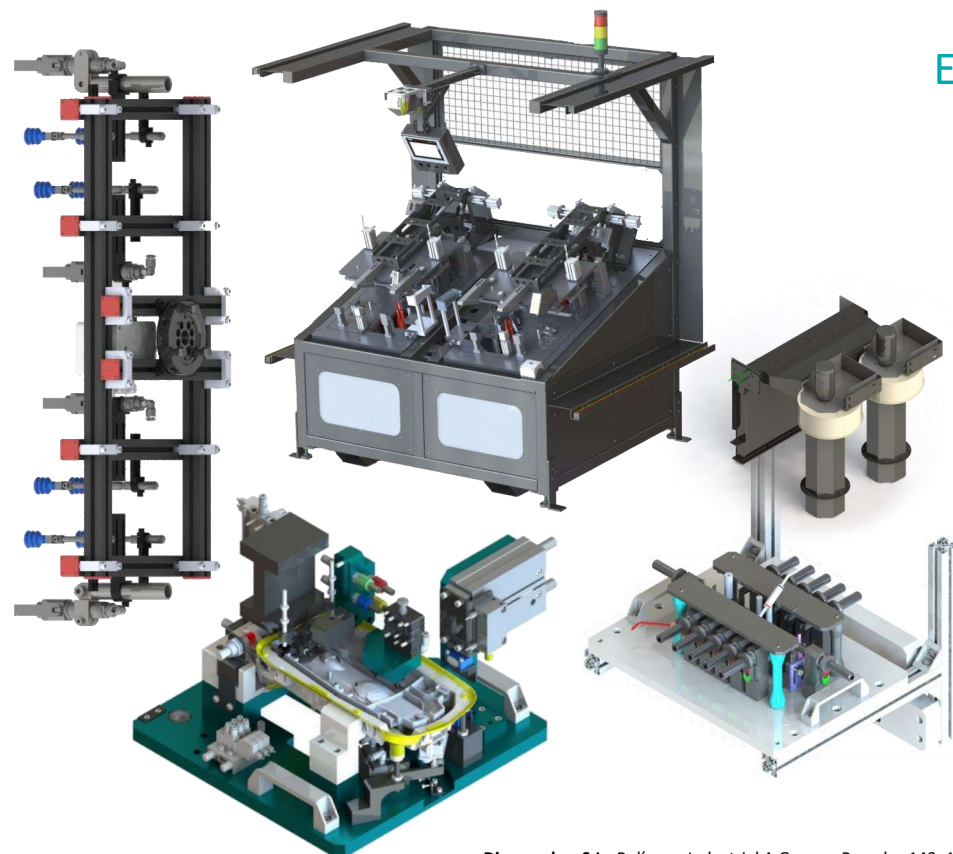

Desing

Execute

## Engineering and equipment

From the beginning, the mechanical, electrical, automatic, and program departments will look for all possible solutions to perfectly integrate all aspects of the project and make the final product what the customer expects and needs.

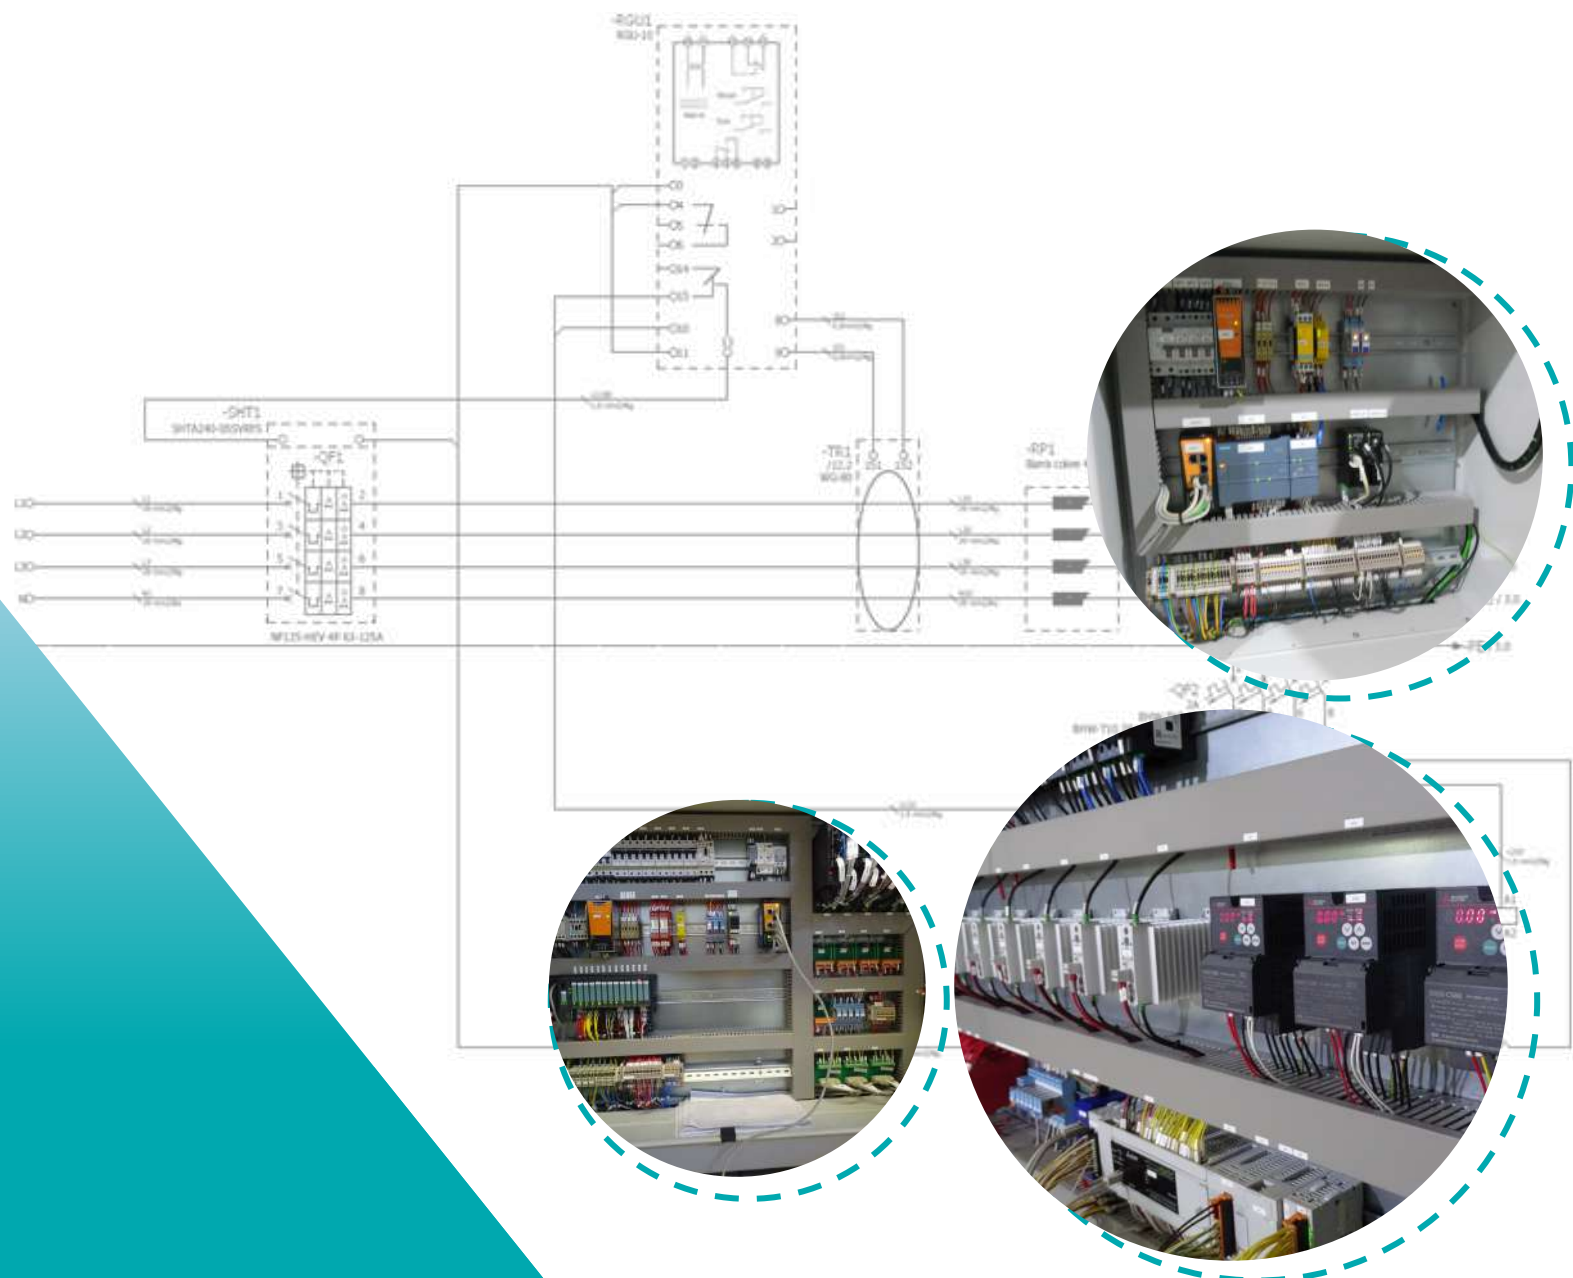

# ELECTRICAL AND PNEUMATIC ENGINEERING

## Integration engineering

Electric and pneumatic engineering is one of the pillars of Diservaulec, since without it, we would not be able to perform the work we do for our customers.

We design, develop and start up any electrical equipment.

# SOFTWARE ENGINEERING

Engineering and equipment

Diservaulec develops specific programming software for different application environments for uses in personal and industrial computers, within automats, robots, and other types of process controls.

We collect data, do historical data, manage, and create traceability to be able to integrate it into an assembly line or industrial process.

# ROBOTIC ENGINEERING

## Robotics

Diservaulec supplies robotic systems adapted to customer requirements.

All systems are designed and supplied by Diservaulec so that you will not need more than one supplier. We have the resources and expertise to meet all challenges.

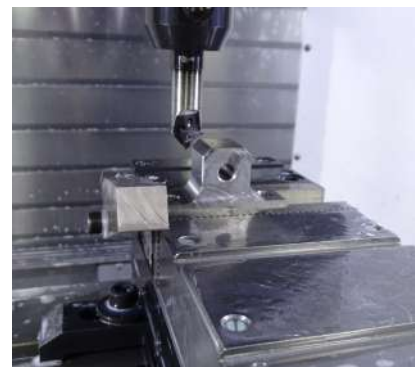

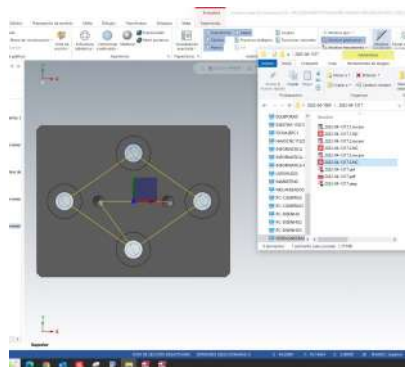

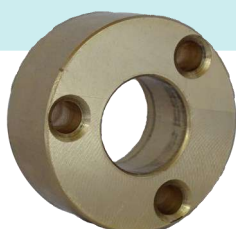

We offer innovative solutions and take full responsibility for: the design, assembly, evaluation, and installation of customized robotic systems.

# PRODUCTION MEANS

## Machining centers

Diservaulec has several CNC/CAD machining centers that ensure complete traceability and quality of the parts built in all projects carried out.

## Mechanical and electrical workshop

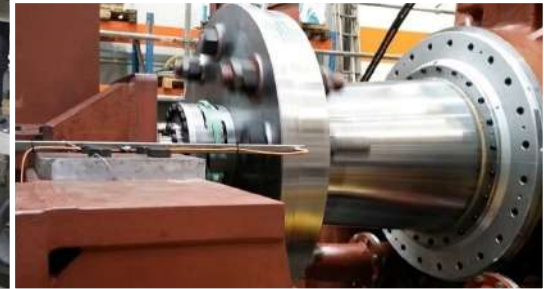

Diservaulec has the means and control systems necessary to guarantee the perfect assembly of all project components in our workshop.

# TEST DELIVERY

## Tests and trials

Diservaulec tests and checks each of the different equipment, systems, and machines it manufactures, thus guaranteeing correct operation before delivery.

## Turnkey deliveries

Diservaulec carries out turnkey deliveries, i.e. we carry out all the necessary tests before delivery to the customer and we place it on their premises.

# TRAINING AND DEVELOPMENT

## ORGANIZE

We prepare and organize the training course so that it adapts as much as possible to the needs of the client.

## PLANNING

In all courses that we do, we have DEMO equipment based on real and tested applications.

## TRAINING

Servomotor programming and robot programming are examples of the courses we teach annually.

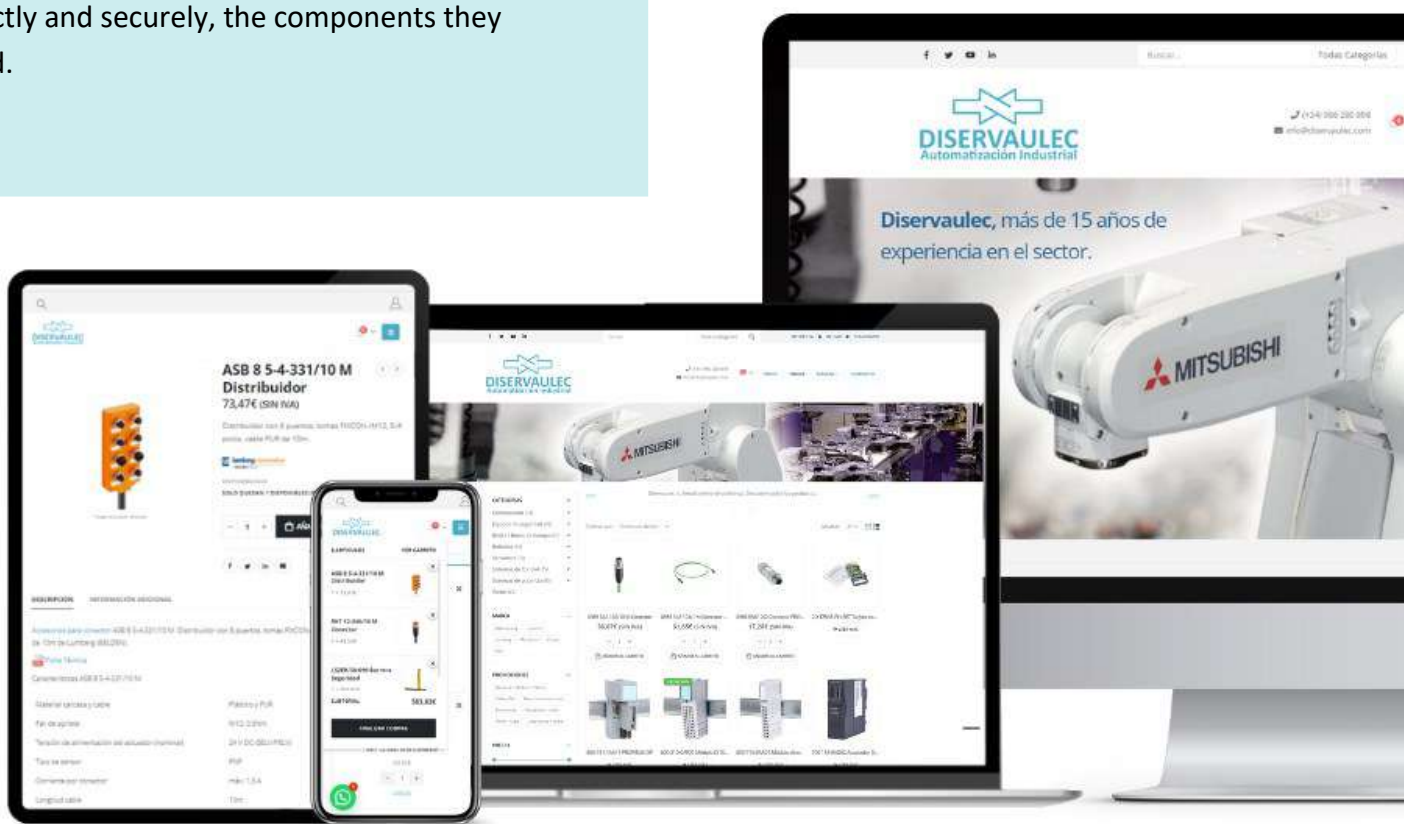

# DISERVAULEC ON INTERNET

## Online Shop

Diservaulec's online store, is a platform designed to get closer to the industrial sector, with a large selection of products from the best brands.

The purpose is that anyone, from anywhere and with any device, 24 hours a day, can buy directly and securely, the components they need.

Products of the best brands

Different payment methods

Advice and follow-up of purchase

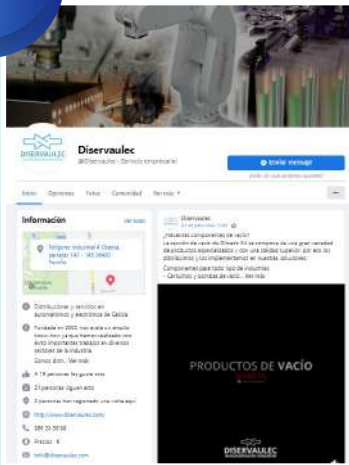

Availability 24hours/7days

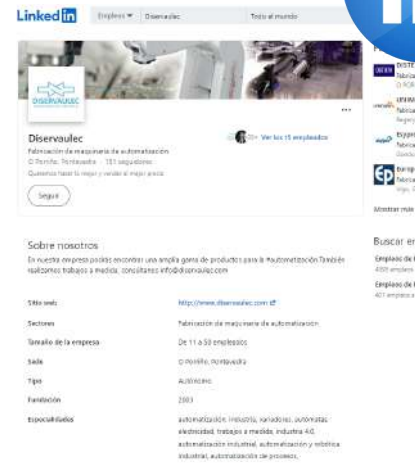

Descriptions, data sheets and catalogs for each of the products.

# Social media

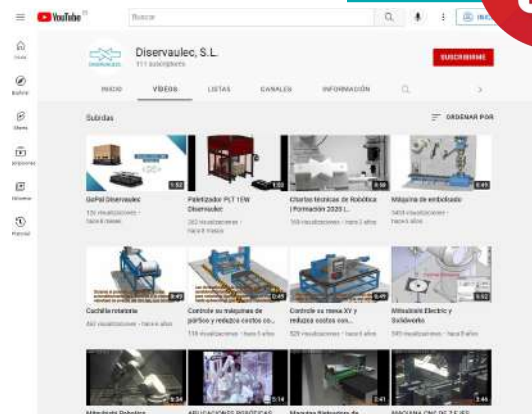

Since 2012, Diservaulec's Facebook profile and company page have been created with the aim of not only maintaining proximity to its customers but also to developing the process of humanizing the brand.

LinkedIn is social network specialized in business profiles. Diservaulec created its profile in 2015. Its purpose is to maintain relationships with potential customers, contact new people and companies and strengthen the brand.

In 2012, Diservaulec created its Twitter profile to provide visibility to the brand, carry out promotions and promote the company's products and services on a channel that stands out for its proximity to customers.

YouTube, Diservaulec's channel since 2012, was created to disseminate videos of a myriad of products and solutions that will also be published on other social networks. Video is the preferred type of publication.
